SUMMARY

Highly skilled software developer with 5+ years of experience leading teams and delivering projects on time. Proficient in the entire software development lifecycle, from concept to deployment. Possesses strong technical skills in web development, as well as database management.

EXPERIENCE

NO Brain IT Solutions PVT LTD

July 2021 – April 2025, Pune

Module Lead

- September 2022

- Delivered a project **one week before schedule**, ensuring seamless deployment and exceeding client expectations.
- Optimized system architecture, resulting in a **20% increase in application performance** and a **30% reduction in response time**.

.Net Full Stack Developer

- May 2021 to September 2022

- Optimized database query systems, enhancing backend performance by **25%** and significantly improving API response times.
- Designed and developed a fully dynamic, **multi-tenant clinical trial platform**, successfully delivered to the client.

Webphoros

May 2020 - March 2021, Bramhapuri

Senior Software Engineer

- Learned new frameworks and built a mobile app within tight timelines, showcasing adaptability and technical expertise.
- Developed a **food donation app** that helped users locate food donation camps during the coronavirus pandemic, earning an **appreciation mail from the client** for its social impact.

Vandan Medical Foundation

Feb 2018 - Dec 2018, Nagpur

Senior Software Engineer

- Transformed a multi-page application into a streamlined **single-page application (SPA)**, enhancing user experience and navigation.
- Revamped the registration and barcode scanning process, increasing user registrations by **60%** through a more efficient and user-friendly portal.

PROJECTS

M-12 Planner - Business planning and forecasting platform

Project Description

Developed a full-stack web application that empowers businesses to plan and forecast their financial performance effectively. The platform leverages historical data to generate predictive models, enabling users to:

- **Simulate various business scenarios:** Explore potential outcomes under different market conditions and strategic decisions.
- **Identify areas for improvement:** Pinpoint potential profit loss and areas requiring optimization.
- **Gain valuable insights:** Visualize data trends, forecast future revenue, and make informed business decisions.

Role: Backend Developer

Responsibility

- Developed and maintained a robust and scalable full-stack web application using React for the frontend and Node.js for the backend.
- Designed and implemented high-performance REST APIs and stored procedures in MS SQL Server to optimize data processing and calculation of complex planning models.
- Played a key role in the entire development lifecycle, from design and implementation to testing and deployment.

Technologies

- Node, React, MS SQL SERVER

Department of Finance (DOF) Portal

Project Description

Developed a comprehensive departmental portal for the United Arab Emirates' Department of Finance (DOF) to streamline internal operations and enhance employee engagement. The portal encompasses a variety of functionalities, including:

- **Employee Performance Management:** Facilitates efficient performance evaluation, goal setting, and feedback mechanisms.
- **Training Management:** Provides a centralized platform for managing training programs, registrations, and tracking employee progress.
- **Internal Communication:** Enables seamless dissemination of announcements, department news, and updates.
- **Restaurant Menu Management:** Offers a user-friendly platform for managing and displaying restaurant menus.
- **Polls and Surveys:** Allows for easy creation and distribution of polls and surveys to gather employee feedback and insights.
- **Document Management:** Integrates with SharePoint for secure document storage, collaboration, and version control.

Role: Senior Software Developer

Responsibility

- Developed and implemented backend functionalities for the DOF portal using ASP.NET Core Web API.
- Contributed to the design and development of RESTful APIs for specific modules, such as employee performance tracking or training management.
- Implemented database queries and stored procedures in SQL Server to support backend operations.

Technologies

- Angular, ASP.NET Core Web API, MS SQL SERVER, SharePoint

Teacher Quality Improvement Program (TeaQIP)

Project Description

TeaQIP is an innovative student feedback system that empowers teachers to elevate their teaching quality. It facilitates a more learner-centered approach, ensuring their instruction is impactful, engaging, and directly aligned with the needs of society, industry, business, and students.

- **Student-centric:** Focuses on gathering direct and honest feedback from students about their learning experience.
- **Data-driven:** Employs a structured system for collecting, analyzing, and interpreting student feedback data.
- **Action-oriented:** Uses the collected data to identify areas for improvement in teaching methods, curriculum, and overall learning environment.

Role: Team Lead

Responsibility

- Participate in the recruitment process, onboard new team members, and ensure they have the necessary resources and support to succeed.
- Foster a positive and collaborative team environment, build strong relationships among team members, and motivate the team towards achieving project goals.
- Conduct regular performance reviews, provide constructive feedback, and identify areas for improvement for each team member.
- Address and resolve conflicts within the team effectively and efficiently.
- Contribute to the development of the project plan, including defining project scope, objectives, timelines, and deliverables.
- Assign tasks to team members based on their skills and experience, ensuring efficient workload distribution.
- Monitor project progress, identify potential roadblocks, and take corrective actions as needed.
- Identify and mitigate potential risks that could impact the project's success.
- Maintain open and transparent communication channels within the team, ensuring everyone is informed and aligned.
- Conduct regular reviews of project deliverables to identify and address any quality issues.

Technologies

- Angular, ASP.NET Core Web API, MS SQL SERVER
